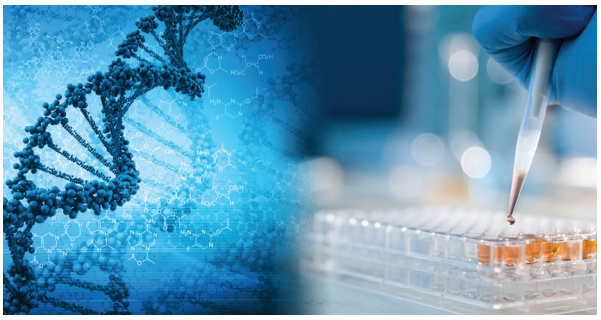
ShareVault® for Life Sciences

BioPharma Partnering, Fundraising and Service Provider Communications

Share documents. Simply, securely.

ShareVault is a state-of-the-art secure document sharing solution that allows you to simply and securely share sensitive documents in the cloud. During partnering, fundraising or CRO/CMO communications, it's important to retain control over all of your intellectual property, financial information and confidential documentation.

ShareVault offers an intuitive, easy-to-use and customizable interface that provides powerful document control capabilities while providing state of the art security features like digital shredding, customized watermarking and a complete audit trail.



Applications

BioPharma Partnering & Alliance Management

Business Development

Due Diligence Data Room for Fundraising, Asset Sales, M&A, Spin-Outs, In- and Out-Licensing

Communications with Board Members, Investors, Distributors, Vendors, Attorneys, External Advisors, Consultants, and Other Outsourced Services including CROs and CMOs

Clinical Trial Transparency

Document Control

- Disable print, save, copy/paste and screenshots

"During the last 5 years we've used ShareVault to securely share sensitive clinical development data with investors and corporate partners on a global basis. ShareVault is more intuitive and user-friendly than other platforms we've used and the technology performs well over a wide range of operating systems, browsers and security barriers. We've also found it invaluable to be able to monitor data room activity (down to the page level) of individual users, informing us on the interest level of our clients and allowing us to have constructive follow-up discussions."

— Jonas Ekblom
President, Pergamum AB

"Deals are complicated enough without making the due diligence process more complicated than it needs to be. I've used a number of data rooms over the years on both the buy- and sell-side of transactions, and ShareVault is the most intuitive and functional of any of them. ShareVault allows for effective and efficient data access while providing full control, visibility, and security. ShareVault was so useful in our transactions that we also began using it for internal document storage and sharing."

— William Stilley
CEO, ADial Pharmaceuticals
