SHAREVAULT
CONNECTOR FOR BOX

ShareVault is the only full-featured virtual data room provider offering a connector for Box.
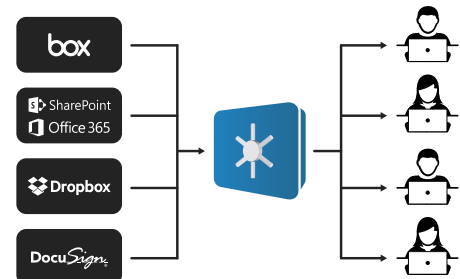

The ShareVault Connector for Box syncs files from Box to ShareVault, so you can get the best of both worlds by combining the collaborative content development tools in Box with ShareVault's leading document control and organization capabilities for secure external file sharing.

SEAMLESS INTEGRATION

The ShareVault Connector for Box takes minutes to set up. Once set up, the content in the synced folders is automatically kept up-to-date and has the same hierarchical structure as the folders in Box.

SINGLE PANE OF GLASS FOR ALL YOUR SENSITIVE CONTENT

ShareVault Connectors enable **seamless integration with Box, Dropbox, SharePoint, Office365 and DocuSign**. You can add multiple connectors to aggregate content from different organizations on a single "pane of glass," so that your external users can login to a single web application to securely access content from all of your various cloud-based services.

WHY NOT JUST USE BOX FOR EXTERNAL SHARING OF CONFIDENTIAL DOCUMENTS?

Box is a fantastic choice for collaborative content development with internal and trusted external users. Box's rich feature set allows customers to develop best practices for document-centric collaboration.

However, when it comes to external sharing of confidential documents in business applications such as due diligence, the best practice is to use a full-featured virtual data room to secure your documents and streamline third-party review.

FEATURES

ShareVault was designed and built from the ground up for external sharing of sensitive documents, with the following capabilities:

Granular Permissions, Document Security Policies and DOCUMENT CONTROL FEATURES INCLUDING:

Customizable watermarking based on policies

Information Rights Management (IRM) for remote shredding

Secure printing to block printing to PDF

Screenshot blocking

User Activity Reporting:

Detailed user activity monitoring, including specific pages viewed, time spent reading and IP address tracking

Built-in analytics provide a real time audit trail and insights into user behavior

Organization Features:

Ability to freeze the index

Includes batch print in order of the data room index (if users have printing rights)

Ordering the hierarchy

Auto-numbering to provide a numerical hierarchical index

A Configurable Confidentiality Notice Displayed Upon Login
