

ShareVault CONNECTOR FOR DOCUSIGN

Streamline eSignature Workflows by Connecting DocuSign to ShareVault

The ShareVault Connector for DocuSign allows for you to send ShareVault documents through the DocuSign eSignature workflow. Taking just minutes to configure, the connector streamlines standards-compliant document workflows, reduces errors and improves traceability at a lower cost.

Benefits for Financial Services Customers

ShareVault customers in Financial Services can manage eSignature workflows to streamline a number of important tasks including processing loans, applications, transactions, and other approval procedures, all while cutting costs, minimizing errors and ultimately enhancing customer satisfaction. The solution is compliant with leading applicable digital signature standards for financial services, including ISO/IEC 27001:2005, eIDAS, xDTM, PCI and TRUSTe.

Benefits for Life Sciences Customers

Whether you are in biopharma, diagnostics or medical devices, the ShareVault Connector for DocuSign can be used to streamline clinical trial onboarding, approval of vendor contracts, authorization of SOPs, management of change control processes, implementation of GxP and other signature workflows. The solution complies with applicable digital signature standards such as (CFR 21 Part 11), eIDAS, EMA, ISO/IEC 27001:2005 and SAFE-BioPharma.

Benefits for Healthcare Customers

The ShareVault Connector for DocuSign can be used in the healthcare industry to improve the efficiency of handling HIPPA forms, claims processing, practice credentialing, signing provider agreements and/or any other tasks requiring approval. Streamline your approval processes while complying with HIPPA regulations and digital signature standards such as 21 CFR Part 11, eIDAS, EMA, ISO/IEC 27001:2005 and SAFE-BioPharma.

Benefits for Customers in Other Industries

Regardless of your industry or sector, the ShareVault Connector for DocuSign enables paperless eSignature workflows to be easily deployed for improving the efficiency of signing customer contracts, vendor agreements, client engagements, memorandums of understanding, document approvals, processing forms, or any other signature workflow. Conforming with major applicable standards, the ShareVault Connector for DocuSign provides the compliance you need to go paperless.

SEAMLESS INTEGRATION

The ShareVault Connector for DocuSign combines the industry-leading flexibility, compliance and ease-of-use of DocuSign's eSignature workflow with ShareVault's secure, enterprise-grade document sharing platform.

- 1 Setup is a breeze, and takes only minutes. Just enter your DocuSign account credentials to create a connector.
- 2 Once it's configured, right-click on any document (or multiple documents) and select "send to DocuSign" to open a DocuSign window right within ShareVault.
- 3 Enter your recipients and define the eSigning workflow that you want for your "envelope" and click "Send."

The eSignature workflow will follow the steps you have defined, and when complete, the signed document will be placed in ShareVault with all of the signatures and an optional signing certificate appended. All of the powerful DocuSign features including email alerts, signature placements, form fields, template design, and the eSignature workflow flexibility are presented within ShareVault in the DocuSign user interface.

Single Pane of Glass for All Your Sensitive Content

ShareVault Connectors provide **tight integration with DocuSign, Dropbox, Box, SharePoint and Office365**. You can add several connectors to assemble content from various organizations in a single "pane of glass," so your outside users can access a single web application to securely view documents from multiple platforms.
